

Trigger Questions

The Futurecast Canvas

These trigger questions are designed to help you explore your own Futurecast Canvas. Cici, our AI canvas coach is ready to help you on each of these questions over at itza.io/futurefellows if you'd like a little encouragement. Remember asking bold, beautiful questions is one of the most powerful skills an ecopreneur can master - so make sure you add in your own questions as you go!

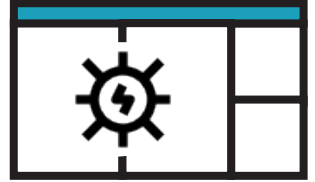

Name Your Scenario

- 1) What's the main feature of the future you're imagining? Think about what sets it apart from today.
- 2) What should people feel when they learn about your envisioned future? Consider how your description can bring about these emotions.

Today's Challenges: Personal

- 1) Are there any individual habits or practices in people's daily lives that might conflict with your envisioned future?
- 2) Are there any beliefs or mindsets that individuals might need to change for your envisioned future to become a reality?
- 3) Is there anything more people need to be more aware of to make sure your envisioned future possible?
- 4) Do individuals have enough choices in their decisions related to your envisioned future?

Trigger Questions

The Futurecast Canvas

Today's Challenges: Local Community

- 1) Are there any financial barriers for local communities to enable your envisioned future?
- 2) Are there any agreements or commitments that local communities need to make to enable your envisioned future?

Today's Challenges: National

- 1) Does your country depend too much on something and that is a challenge to enabling your envisioned future? (e.g. an over-reliance on a type of energy source).
- 2) Are there any laws and policies that need to change to enable your envisioned future?
- 3) Does your government need to change any subsidies or taxes to make the envisioned future possible? Or to accelerate it?
- 4) Are there any barriers to implementing change on a national scale related to your envisioned future?

Today's Challenges: Global

- 1) Are there any barriers to countries collaborating on enabling your envisioned future?
- 2) Are there any global supply chains that would need restructuring to enable your envisioned future?
